OBJECTIVE

Motivated 2nd-year B.Tech CSE (AI & ML) student at Jain University, Bangalore, with recent hands-on experience in customer churn prediction and credit card fraud detection using Python and ML. Seeking an internship to deepen expertise in AI/ML and deliver impactful data-driven solutions.

SKILLS

- Programming & ML: Python, Scikit-Learn, Pandas, NumPy, Matplotlib
- Algorithms & Techniques: Classification, Regression, Feature Engineering, Model Evaluation
- Tools & Platforms: Git, GitHub, Docker (basic), Jupyter, Google Colab
- Soft Skills: Analytical thinking, detail orientation, adaptability, teamwork

EDUCATION

Bachelor of Technology – Computer Science (AI & ML)

Jain University, Bengaluru (2022 – 2027)

Expected Graduation: 2027

INTERSHIPS

Machine Learning Intern – Codesoft (June 2025 – July 2025)

- Building and refining models for real-time.
- Working extensively with Scikit-Learn and data handling in NumPy/Pandas

PROJECTS

Customer Churn Prediction (In Progress)

- Designing a model to anticipate customer attrition for a telco dataset
- Using feature selection, data cleaning, classification models (Logistic Regression, Random Forest)
- Planning model evaluation with ROC curve, precision-recall metrics

Credit Card Fraud Detection (Completed)

- Developed a Random Forest and Logistic Regression classifier
- Applied oversampling (SMOTE), confusion matrix, and hyperparameter tuning
- Achieved 98% accuracy on Kaggle dataset; documented code in Jupyter Notebook

CERTIFICATIONS

- Foundations of Data Science and Machine Learning with Python-
